Work Experience

August 2019 - June 2022

Startxlabs Technologies

Javascript Developer

Started my journey as React Native developer with startxlabs technologies and worked on 7+ mobile applications & multiple web application for functionality integrations, component development & setting up the project boilerplate.

I've worked on several front-end problems like

- Build custom UI for calendar (Day, Week and Month) view
- Swipe picker
- Custom graphs like bellgraph and snowflake
- Build a form validation framework from scratch using module pattern.

Other than coding other responsibilities I've was to

- conduct interviews
- provide training to new hires in such a way so that can work independently with less guidance and should be able to tackle problems by themselves
- Assigning the daily task to a project team I was lead of

May 2019 - August 2019

Credit Culture

Full Stack Web Developer

Started my journey in React with credit culture. Worked on both frontend and backend (Lambda Api's) but mostly working on frontend to build product platform dashboard in React.js.

I tackle tasks like improving the dashboard performance by profiling the components and detaching the unnecessary render by colocating the state & designing of reusable component by collaborating with other team members.

September 2018 - December 2018

Acumax Technologies

Node.js Trainee

Responsible for development of REST Api's & full stack application in Express.js.

Education

2014 - 2017

Kumaun University Nainital
B.Com (Bachelor of Commerce)
