Ashish Mehra

React Native Developer

A visual learner, self-taught developer with 3+ years experience building mobile/web apps. Enthusiastic about continuous learning and tech exploration in my spare time.

Portfolio: https://ashishmehra.dev

Work Experience

October 2022 - September 2023

SDE-1 | Mobile App Development
Locofast

Actively contributed to enhancing the React Native development process, effectively boosting app performance on low-end devices. Moreover, I held the responsibility of developing the iOS app.

August 2019 - June 2022

Javascript Developer
Startxlabs Technologies

I embarked on my journey as a React Native developer with StartXLabs Technologies, where I contributed to the development of over 7 mobile applications and built various web applications. These projects featured key modular attributes, including functional integration, component development, and the creation of boilerplate structures.

Throughout my tenure, I tackled various challenges spanning different verticals. These ranged from crafting custom calendar view UIs, swipe pickers, to designing intricate graphs using CSS & JS for comprehensive data visualization.

May 2019 - August 2019

Full Stack Web Developer
Credit Culture

I started my journey in React with credit culture. Worked on both frontend and backend (Lambda Api's) but mostly working on frontend to build product platform dashboard in React.js.

Improved the dashboard performance by profiling the components and detaching the unnecessary render by collocating the state.

September 2018 - January 2019

Node.js Developer
Acumax Technologies

Responsible for the design and development of the backend application in Express.

Education

2014 - 2017
Kumaun University Nainital
B.Com (Bachelor of Commerce)

2012 - 2014
Chhauni Children's Academy
Intermediate (Commerce)

2009 - 2012
Samar Study Hall
High School

Skills

React

Next.js

React Native

HTML/CSS
