SUMMARY

Senior software engineer with 7+ years shipping production mobile and web apps in React Native, React, Next.js and TypeScript. These days I build with AI coding agents — I plan, steer and review while agents handle much of the implementation — and I'm learning to build AI systems: RAG, agentic workflows and MCP tools.

SKILLS

Languages	TypeScript, JavaScript, PHP
Mobile	React Native, Reanimated
Web	React, Next.js
Backend	Node.js, GraphQL, Prisma, Supabase, AWS Amplify
AI tooling	Claude Code

EXPERIENCE

Appinventiv
Apr 2025 – Present

Senior Software Engineer

Freelance
Aug 2024 – Apr 2025

Full-Stack Developer / UI-UX Designer · Remote

- Built dashboards for EdTech products.
- Delivered for Australian clients: an IT asset lifecycle platform and a Sydney pest-control website with a CMS and admin panel.
- Created reusable design systems in Figma.

ByteLearn
Oct 2023 – Jul 2024

Frontend Developer · React & React Native · Remote

- Worked with math SMEs to design and launch the worksheet module, combining an SEO-focused content system with structured problem fine-tuning to improve AI chatbot answer accuracy and expand organic reach.
- Automated sitemap generation and worksheet PDF creation in Strapi, cutting manual effort by 40%.
- Led the POC and built the whiteboard and AI Tutor flows, plus authentication and premium subscription purchases end to end.
- Acted as technical point of contact for an outsourced team, then took the codebase in-house and owned iOS and Android releases.
- Set up analytics and user-journey funnels with Singular, Amplitude and Meta SDKs, working with the Kommunicate, Agora and Singular teams on React Native compatibility.

Locofast
Oct 2022 – Sep 2023

SDE-1, Mobile App Development · Remote

- Led a team of 3–5 engineers, running sprint execution and releases.
- Owned end-to-end development of Locofast's key mobile apps.
- Improved performance on low-end Android devices through profiling, state refactors that cut re-renders, and API caching.
- Led fast development of the Locofast customer iOS app for internal teams.

Startxlabs Technologies Aug 2019 – Jun 2022

JavaScript Developer · Remote

- Shipped 7+ client apps while leading frontend development across app and web projects.
- Cut project setup time by 70% with reusable boilerplates.
- Mentored 4–7 junior developers in React and React Native, interviewed candidates and ran frontend workshops.
- Built Node.js APIs and cron jobs, optimised queries, and worked daily with offshore teams.

Credit Culture May 2019 – Aug 2019

Full Stack Web Developer

Acumax Technologies Sep 2018 – Dec 2018

Node.js Trainee

PROJECTS

Buddigo 3rd place, notJustHack 2024

A travel companion app focused on making trips easier. Live on the Play Store.

MoneyPal React Native, TypeScript, Supabase

An expense and budget manager that gives you full control over your finances.

Habitual — E-commerce app and admin portal React Native, Next.js, Stripe, Prisma

Browse categories that match your interests and check out straight from the home screen, with a web portal to manage products, categories, users and orders.

EDUCATION

Kumaun University, Nainital 2014 – 2017

B.Com, Bachelor of Commerce
